

# New Premises due to growth for Advance Agriculture

The team at Advance Agriculture Balclutha can now be found at the new Rosebank industrial site just south of Balclutha at 1 Fyall Drive off State Highway 1. Over the last few years the facilities at 1 Barr Street were pushed to its limit. Not only has there been growth in staff numbers there has been significant growth in agchem and seed volumes so the move is well overdue.

The staff will be able to enjoy the winter in their new warm premises. Karla Gilder Store Manager and Mark Ferguson will continue to man the store.

Advance Agriculture have mixed and sold seed for 12 years and in 2016 a seed mixer was installed in Balclutha to take the pressure off the Invercargill store. Having the ability to mix their own seed is a strength of Advance Agriculture. Having extra

space will now allow the store to carry more stock (Agchem, machinery and parts included) through the busy time. This will make us less vulnerable to freight delays, says Karla. Our seed mixes are very varied and are driven by what the customer needs from their pastures and crops. We pride ourselves in the experience and knowledge of our staff and our ability to share this knowledge throughout the team. Not only do we have Nickada Bunting supporting Richard, Simon and Chris on the road we have Merran Casse joining the team later in November as a trainee field representative.

Anyone is welcome to pop in for a coffee and there is now room to sit and chat to customers about their requirements.

Seed mixer to be installed ready for the busy spring ahead.

Chris Bunting, Simon Walker, Richard Devlin, Mark Ferguson, Nickada Bunting, Karla Gilder

Plenty of space to store products for the coming seasons.
